

## Attention Salt Water Chlorine Generator Owners

Manufacturers of salt water chlorine generators are recommending that the units should not be turned on until the pool water reaches 60+ degrees, the water is clean, clear, the pH and alkalinity are balanced, you have an established chlorine reading of 1-3ppm and the proper amount of salt has been added per your manufacturer's recommendation.

**That being said we will not be able to turn on salt water chlorine generators as part of the spring assembly.**

Depending on when your pool is opened, supplemental chlorine (tablets or powder) should be used prior to turning on the salt water chlorine generator.

The chlorine level should be kept between 1 and 3 ppm. In actuality, this will help the generator achieve a better chlorine reading when it is turned on.

We have small quantities of tablets and powder available.

Please call if you need additional service to balance your pool water, deliver salt, or turn the generator on.

## Pacer Pool Service & Supply, Inc.

Newsletter 2016

Greetings!

Spring is on its way! I think we can all agree it can't get here soon enough! We at Pacer are excited for the new season and looking forward to the Summer of 2016. Pacer has all the chemicals and supplies you need, along with expert advice (and free delivery!) for an extraordinary swimming pool season.

Due to the increase in credit card fraud protection, we at Pacer are doing everything we can to help keep your information secure. While we have taken the "paying with a credit card" option off of our contract you are still able to pay with your card. The enclosed form can be filled out and sent back with your contract via mail, fax or email. If you are still uncomfortable with that simply call our office and we can take the information over the phone!

With all of the advances in technology we now offer TEXTING! If you provide us with your cell phone number we will text message you with reminders about your pool opening and closing dates, when your service call is complete, when your order is delivered and many more things!

### **Cover Filled with Water?**

Please let us know if you would be interested in our **Spring Cover Pump Off** – **\$50.00 per half hour**  
Call or email and Pacer will take care of the rest.

### Important Pool Owner Notice

Don't forget to add one gallon of winterizing algaecide to your pool water when the weather breaks this spring. Doing so will help prevent your pool water from turning green during those warm spring days prior to opening.

Stop by the store and get your gallon or  
Call 610-269-7800 or email [info@pacerpools.com](mailto:info@pacerpools.com) to have us deliver & install it for you!

Friend us on Facebook and keep up with our website for Specials throughout the season!

**Did you know? Our retail store is open Sundays from Mother's Day (May 8) till Father's Day (June 19) Check our website for our hours!**
